## COMMERCIAL AND RETAIL PRODUCTS

### 800 Made-to-measure aluminium curtain walling

Reynaers Aluminium developed and supplied bespoke curtain walling for Eleven Brindleyplace in central Birmingham. Using its CW60 and CW73 curtain walling systems, and CS68 doors and smoke vents, Reynaers designed seven made-to-measure profiles and three dedicated accessories. The office building is designed by Glenn Howells Architects.

### 801 Powerful operators

High torque Tormax TXP operators power the lobby entrance system at 50 St Mary Axe in the City of London, designed by Black Architecture. The entrance comprises an inner and an outer sliding door, each measuring 1400x2600mm. TXP provides a powerful motor, a robust sliding track system and a double set of infra-red safety beams.

### 802 Investing in solar shading

Levolux provided a bespoke Solar Shading System for Scottish Widows' Exchange Place 3 in Edinburgh, designed by creArchitecture. Sustainably-sourced Accoya Timber Fins, laminated Glass Fins and Matrix XL Brise Soleil combine to prevent excessive solar heat gain in the naturally-ventilated offices. The building has achieved a BREEAM 'Excellent' rating.

### 803 Vinyl's stone tile mimicry

Luxury vinyl floor tiles from Polyflor's Bevel Line Project Collection are installed in fashion departments at Peacocks store in Wrexham. An Ivory Stone finish was chosen to complement ceramic tiles used in other areas of the store. The 457x457mm tiles have bevelled edges for an authentic tile appearance and a 0.7mm wear layer.

### 804 Aircrete performs

The use of H+H's Hi-Strength 7N aircrete instead of fair-faced aggregate block on 11 retail units at Shires Gateway, Trowbridge, is said to have improved thermal performance through the wall and maximised floor space. Architect Black Architecture specified 140mm thickness for the outer walls' inner leaf and 125mm for the two skins of inner blockwork.

### 805 Shopfronts & hardware

Dorma's glass division supplied HSW sliding glass partitions plus Patch and Rail fittings for a number of shopfronts at the Stirling Prize-nominated Liverpool One. The scheme's One Park West residential development, designed by Cesar Pelli Architects, also features Dorma products: three ED200 automatic swing doors and some 40 sets of stainless steel AD4000 Series panic bolts were supplied.

### 806 Fibre cement cladding

Marley Eternit's Natura Plus fibre cement cladding is used at 3 Assembly Square, located next to the Welsh National Assembly in Cardiff. Through-coloured Opal panels were fitted using a structural adhesive system to create a rear-ventilated cladding system. The £13m BREEAM 'Excellent' rated office development is designed by Scott Brownrigg.

### 807 A warm reception

JS Air Curtains supplied a bespoke slate-grey Rund air curtain for the refurbished reception at Cadbury's Birmingham offices. Featuring a round design, the two-metre-wide air curtain is independently mounted on matching slate-grey posts. It can also be suspended from cables, stood vertically by the side of a door, or attached to a wall or ceiling using arms.
